

## **Mondo - Donny Sakulprasertying, young and talented Thai guitarist in search of Jazz roots**

**Dal nostro corrispondente a Bangkok - 20 giu 2022 (Prima Notizia 24) About to travel to the United States to perfect his knowledge of jazz, the very young guitarist Donny Sakulprasertying sees his name rising strongly in the Thai jazz scene.**

About to leave for the United States where he will perfect his Jazz studies, we interview the very young Thai guitarist Donny Sakulprasertying, who has been passionate about Jazz since a very young age. When you began to play guitar. what age? I start to play guitar when I was 12 (2012) now it's 2022 so this year it's been 10 years since I start to play this instrument. When you entered University, which one are you following and which Course? When I was 16 year old I decided to study music seriously so I choose to study high school at College of Music, Mahidol University in Major Jazz and after graduated high school. I continue to study bachelor degree in same major (Jazz) till now. From your personal point of view and following your personal experience, what's the actual condition in Thailand' Jazz landscape? I can see now a day people are interesting to study jazz more and more but the jazz club and jazz gig in Thailand are still limited, and many restaurant and bar in Thailand are misunderstand what jazz really is they just what to use "Jazz club" as a title of their bar but they still want to include pop-rock song etc... You're very young and talented, everybody can realize you're well educated and a fine student. What you could suggest to boys and girls who want seriously begin to study and work with Music? I mean there are a lot of fine and talented students in Thailand. But very few who pay attention to go to club or jazz bar to play real gig or jam with professional musician. I think this kind of experience is so important If you want to be a professional musician in future. of course you can't practice in the room to get this kind of experience. Can you describe your projects in next future, can you describe your USA experience you're in point to begin? I'm really excited and looking forward to go to New York as a exchange student this year I think I will learn a lot see a lot and it would be great to go to the country that jazz was born. After I'll be graduated Bachelor degree I plan to make my first album!
